

BROADCAST STUDIO INSTALLATION

Designed by Wyatt Communications, the studio desk is suitable for a variety of broadcast situations. The modern style and flexible dimensions, allow for tailoring to room size and can accommodate a range of studio equipment according to the specific needs of clients. (equipment shown below is a typical installation only)

FEATURES:

- Colour can be selected by the client from a wide range of colours.
- Desk size and dimensions designed to fit any studio space.
- Desk can be wall mounted (one side-left or right). Alternatively a free standing desk can be supplied.
- Tubular steel legs (choice of black, white, chrome).
- Desktop equipment housing can be adjusted in size to suit customers equipment.
- Design includes desktop space for computer monitors.
- Computer box and interface equipment housed in a rack under desk cabinet .
- All equipment and cables are off the floor.
- Under desk cable ducting, means that no connecting cables are visible.

ADDITION ITEMS

Building services and room equipment such as air-conditioning, electrical wiring, lighting, office furniture, room fittings and telephone services. These can be organised at the clients request and will be an addition to the studio/control room installation costs.

Computer systems and program automation software can be supplied and configured for studio use as well as a computers for program logging.

Integration of clients existing equipment is possible.

Depending on the location, costs associated with travel, accommodation, equipment hire and freight will be calculated and added to the project quotation.

For a no obligation free quotation and more technical details on equipment supplied, please call.
